

S-3906 Renegade – RGB meets Design

Are you looking for a special case, that moves your lighting concept into new spheres? Then the S-3906 Renegade is just right for you! A slightly tinted Tempered Glass side panel and one wide RGB LED strip, which spans C-shaped over the three-dimensional front panel of the case, make the S-3906 the ideal candidate for a high-end system with elaborate LED lighting. This is not only due to the standard 120mm RGB LED fan, that is installed on the rear panel, but also because of the digital 5V RGB control board with PWM, which accommodates up to 7 additional RGB fans, which are managed via the RGB motherboard control header. Space for up to four additional 3-pin fans round off the connection variety of the integrated circuit board.

In the top of the case are, in addition to the magnetic dust filter inserts, all controls. In addition to two USB 2.0 and USB 3.0 ports and HD audio jacks, there is a switch for manually switching through the LED effects. Another removable dust filter under the power supply and a variety of ways to lay the cables, complete the offer.

- ✓ RGB control board (allows effects like running light or rainbow)
- ✓ 3pin RGB header connector for digital 5V RGB motherboard control
- ✓ Includes two RGB LED strips and a 120mm RGB fan
- ✓ Side panel made of Tempered Glass
