**Important! Please UPDATE the keyboard if you find flickering LED in Fixed-on RGB backlit mode.**

✓ **If you have any question about this keyboard, please feel free to contact us via <support@redragonshop.com>. We will always reply you within 24 hours.**

1. Run *Update Tool for Solid RGB Mode* exe file to update the keyboard

2. **Case A, Code Version: 0101** means the keyboard is successfully detected for update

3. Close the update tool window when the update is complete with **PASS**, then **replug** the keyboard.

The keyboard Fixed-on RGB mode will be repaired automatically with no flash LED.

4. **Case B, Code Version: 0000** means the keyboard is not detected for update.

Try to right click the exe file and **Run as administrator**, then the update tool is permitted to detect the keyboard with **Code Version: 0101**

5. Do the update.

Notes: The keyboard is ONLY allowed to replug when the update is successfully done, DON'T unplug the keyboard while update is still running.
