

Archer TX23U Setup Guide

Model: Archer TX23U

Welcome! Let's get your adapter set up together!

This guide is here to make the setup easy for everyone. We'll walk you through what's in the box, how the adapter looks, and how to install it and its driver.

To use the adapter, simply plug the adapter into your computer and install the driver. Our driver is designed to work with screen readers and can be installed using just your keyboard!

Ready to explore your adapter and get connected?

Part 1. Learn about your Adapter

This section introduces the adapter's package content and appearance.

1. Unpack Your adapter

Your package contains an adapter and installation guides.

2. Appearance Introduction

The adapter is a small, lightweight device (like a thumb drive) with a smooth plastic body and a metal USB connector at one end to plug into the computer.

Part 2. Get Started

Step 1. Connect your Adapter to a Computer

Insert the adapter into a USB port on your computer directly.

Step 2. Install Drivers

- a. Go to My Computer or This PC.
- b. Double click the TP-Link Disk then run SetupInstall.exe to install driver

Note:

- If you cannot find the setup program, please download the driver at www.tp-link.com/support. You can also check for new releases and download the latest drivers on this website.
- If an unknown publisher message pops up, select Yes to continue.
- If Windows User Account Control requires admin credentials, type user name and password of your Windows administrator account.

Step 3. Join a Wireless Network

- a. Click the network status icon on the taskbar.
- b. Select your Wi-Fi network, click Connect, and enter the password when prompted.

Note: If you cannot find or connect to the wireless network, refer to <https://www.tp-link.com/hk/support/faq/2253/>
