Troubleshooting

Q1. Why is the Power LED not lit?

The Power LED should be lit when the power system is working normally. If the Power LED is not lit, please try the following:

- Ensure the splitter is plugged in with a USB-C charging cable properly.
- Ensure the power supply's voltage meets the splitter's input voltage requirements.
- Ensure the power source is ON.

Q2. Why is the Ethernet Port LED not lit when a device is connected to the corresponding port?

- Ensure that the cable connectors are firmly plugged into the splitter and the device.
- Make sure the connected device is turned on and works normally.
- Try to change the connected device's transmission speed and duplex mode.
- The cable must be less than 100 meters long (328 feet).
